

Medical Van Project (2018 - 2019)

The BOSCO Mobile Medical team provides medical care to the downtrodden and the underprivileged street kids, women and youth in various slums of New Delhi. The team gives counselling which helps them to gain a decent life style and grow with their surrounding environment. Awareness camps are being held to train the adults to deal with the children. Health and hygiene sessions are frequently organized for the slum children in and around Delhi. BOSCO team has chosen locations such as Gurudwara Bangla Sahib, Jama Masjid, Usmanpur, Shahadara, Madanpur Khadar and Seelampur to provide medical assistance to thousands of helpless, poor and homeless people who stay around these locations as well as other places of Delhi. The medical vans are parked right outside the historical and religious buildings, so that anyone who needs assistance can locate the medical team. Medical assistance is provided to mothers, who are pregnant and nursing. Initiatives have been taken to give special attention to individuals from the Rohingya ethnic groups who have been denied citizenship in Myanmar since 1982 and are staying in the slums near Madanpur Khadar. These are some of the activities we have been conducting: 1. Health Camps 2. First-Aid Trainings 3. Health & Hygiene awareness sessions 4. Special sessions on specific days like Environment day, Yoga day, etc. 5. TT Vaccinations Camps 6. Tie-up Meetings with the Police authorities, NGO's and Social Welfare Organizations from time to time for the welfare of the YaR (Young at Risk) children.
