We at the Don Bosco Health Centre, Basant Road, Paharganj, observed that Traumatic Injury, Abscess, URI- Upper Respiratory Infection, and kin diseases are very commonly diagnosed by our medical consultants. Mainly street children who stay at the railway platforms or at the shelter homes of other NGOs visit here for their treatment.

Special Health Camp organized on 21st May 2019 at Meer Dard Colony, Delhi.

Bosco Delhi organised a Health Awareness camp with the help of a local person of the Meer Dard Colony area, Delhi, on 21st May 2019. This local person who helped became a bridge between our Medical Team and the children and their families, is pretty well know in the area; often called as the “Pradhan Ji”. Our Team coordinated with him for the same. The main beneficiaries of this camp were the children who live on the streets with their families. Around 136 children took part in the camp. During this camp Dr. Vijay Kumar spoke to the children about their living styles and suggested ways in which the children and their families could protect themselves from various diseases in the surroundings.
